

Target Audience

Care and Support staff in a variety of settings and Housing Support Teams who provide direct care and support.

This course has been developed to give learners an insight into working with people who are affected by Parkinson's disease. For staff to work positively and constructively with people with Parkinson's, it is essential they have a good understanding of the condition and the effects it has on the lives of the people affected by it.

This course is delivered using a range of methods and resources including:

- ◆ Face to Face tutor facilitation, questionnaires, fact sheets for research activity, scenarios for breakout groups, questioning and participation and an end of session assessment.

This course has been developed and mapped to current occupational standards, qualification frameworks and the following documents and resources:

- ◆ NICE Guidelines: Parkinson's Disease: Diagnosis and Management
